

Navig Aero *dreamsoarer*

Information flyer and press release for *The Flying Show 2013*

The *dreamsoarer* scale concept is a new kind of aircraft. Radical polymorphing architecture gives exceptional flying dynamics and extreme STOL increasing landing possibilities.

Ownership costs shrink using an optimised Superfroude powertrain and an easily trailered and garage-able airframe, opening regular flying to wider worldwide participation. Reduces price through manufacturing simplification.

The *dreamsoarer* has a logical modular family of planned derivatives, from an SSDR self launching sailplane, to aerobatic sports *dreamtourR* and eventually four-seat tourers.

There is plenty of work to be done, however. This journey to full production will take four long, intensive years.

Information For Potential Navig Aero Investors

The journey is from today's concept scale model to fully calculated manufacturing prototype (year one), full scale flying production prototype (year two), batch production (year three) and finally serial production (year four). Navig Aero has a three-year rolling share issue and four-year product development of the *dreamsoarer* and *dreamtourR*.

Most aero-people daydream about creating a revolutionary plane, but alone the prospect is daunting. The Navig Aero project is seeking investor-collaborators who wish to join an adventure leading to volume UK production of a new type of aircraft, the *dreamsoarer*. While there are certainly safer places to invest and better potential returns elsewhere, only with Navig Aero can you contribute to a landmark advancement in aeronautics.

- Early share adopters have first choice on later options.
- Share buy-in is a lot less than you think and is proportionally tax deductible. (SEIS)
- Share scheme, investor briefing agenda and other PDF downloads at www.navigaero.com

Delegates for the investor briefing at Duxford must please pre-register: invest@navigaero.com (places are limited). Do not attend if technically curious or a wellwisher – follow instead on the friend network above.

Non-disclosure agreement and official secrets act signature requirement for all delegates.

Let's forge a dream into reality and fly it worldwide.

dreamsoarer

Investor Briefing

Duxford Imperial War Museum
09:00-18:00 Sat Dec 7th 2013

Join the adventure!

- beautifully elegant aircraft
- trailerborne and garage-able
- polymorphic lifting elements
- **breakthrough architecture**
- SSDR SL glider to light sports
- xSTOL even on rough ground
- sticker price £25k, €32k, \$40k
- superfroude powertrain <5l/hr
- economic modular manufacture
- thrilling flying yet enhanced safety
- **actively seeking project investors**

Stand 67, The Flying Show, Birmingham NEC, Nov 30–Dec 1 2013
