

Navig Aero *dreamsoarer*

Summary sheet for *The Flying Show 2013*

The *dreamsoarer* is a new kind of aircraft. Radical architecture and polymorphing wings provide exceptional flying performance including extreme STOL increasing landing possibilities.

Ownership costs shrink using an optimised Superfroude powertrain and an easily trailered and garage-able airframe, opening regular flying to wider worldwide participation. Reduces price through manufacturing simplification.

There is plenty of work to be done, however. This journey to full production will take four long, intensive years. Join us at until *The Flying Show 2013* to discuss the *dreamsoarer* and a potential landmark advancement in aeronautics.

- beautifully elegant aircraft
- trailerborne and garage-able
- polymorphic lifting elements
- **breakthrough architecture**
- SSDR SL glider to light sports
- xSTOL even on rough ground
- sticker price £25k, €32k, \$40k
- superfroude powertrain <5l/hr
- economic modular manufacture
- thrilling flying yet enhanced safety
- **actively seeking project investors**

Come for a chat, stand 67, The Flying Show, NEC, Nov 30–Dec 1.
